

TREASURE ALELUME

ECONOMICS RESEARCHER / DATA ANALYST

Ibadan, Oyo State, Nigeria | +234 702 503 1893 | talelume@gmail.com | treasure-economics.vercel.app

Economics researcher and data analyst developing full-length research and conducting independent empirical work on Nigerian economic policy. Skilled in research design, literature synthesis, time-series econometrics, statistical analysis, dashboard reporting and clear interpretation for non-technical readers.

CORE EXPERTISE

Research	Economics research, literature review, research design, policy analysis and full report development
Econometrics	ARDL/ECM, ADF and PP unit-root tests, bounds testing, diagnostics and time-series interpretation
Data	Data cleaning, statistical analysis, quality assurance, dashboards and stakeholder-ready insight

EXPERIENCE

Data Analytics Intern	Feb 2025 - Sep 2025
Funding Societies - Remote / Indonesia	
- Cleaned and analysed datasets containing more than 50,000 records per month to support growth and customer analysis. - Built Power BI and Excel dashboards that translated operating data into clear views for stakeholders. - Worked with cross-functional teams to turn patterns in the data into practical recommendations for marketing and growth decisions.	
Sales and Business Development Intern	Jun 2024 - Jan 2025
Elegant Hoopoe - Remote / Dubai, UAE	
- Researched prospects, markets and competitors to identify new business opportunities and support outreach priorities. - Maintained customer follow-up and sales reporting while using performance data to improve campaign and retention decisions.	
Data Analyst Intern	Jan 2023 - Aug 2023
Friendsurance - Remote / Berlin, Germany	
- Analysed customer datasets to identify behavioural patterns relevant to engagement and operational decisions. - Created and maintained Tableau and Power BI dashboards, then communicated findings as concise recommendations.	

EDUCATION

Bachelor of Science in Economics	2020 - 2024
University of Ibadan - Ibadan, Nigeria	

TOOLS

Econometrics and statistics	EViews, Stata, SPSS
Analysis and visualisation	Excel, Power BI, Tableau
Research workflow	Word, PowerPoint, Google Workspace, Zotero, Mendeley, Google Forms, Microsoft Forms
Business systems	HubSpot, Salesforce

SELECTED RESEARCH

The work below includes an undergraduate thesis and selected research collaborations. It is not presented as peer-reviewed or formally published research.

Government Spending and Human Capital Development in Nigeria

Undergraduate thesis | 1990-2022 | EViews

Designed an ARDL/ECM study using annual data from CBN, UNDP, World Bank and WHO sources. Modelled five human-capital outcomes against total, recurrent and capital expenditure measures; completed pre-estimation tests, diagnostics, interpretation and policy recommendations.

ECOWAS Free Movement, Trade and Nigeria's Economic Growth

Research collaboration | 1981-2024 | Time-series econometrics

Structured a growth model around ECOWAS migration and trade shares, investment, labour, social expenditure and inflation. The analysis found mixed contemporaneous and lagged effects, highlighting the role of labour absorption, institutions and macroeconomic stability.

Monetary Policy Rate and Commercial Bank Loans to Small Enterprises

Research collaboration | 1992-2023 | 32 annual observations

Applied descriptive and correlation analysis, ADF/PP tests, ARDL bounds testing, ECM estimation and residual diagnostics. Documented a counterintuitive positive long-run MPR coefficient together with sample-size, structural-break and omitted-variable limitations.

Public Debt Composition and Economic Growth in Nigeria

Research collaboration | 1981-2023 | Public finance

Disaggregated domestic and external public debt in an ARDL/ECM framework and used Granger causality testing. Findings showed time-dependent effects and a bidirectional predictive relationship between debt components and economic growth.

PROFESSIONAL STRENGTHS

Analytical thinking / Critical reading / Structured writing / Data quality assurance / Attention to detail / Remote collaboration / Clear stakeholder communication
